Browser Inquiries API Overview

The Expert Back Office Application Programming Interface (API) Reference set supplies building blocks that allow client developers to create custom Expert Back Office Browser applications, automate processes, and vary deployment models. This Reference set is made up of two parts, and it is intended that these two elements of the API Reference be used together:

- The Browser Common Elements API Reference, which provides a primer on the Expert Back Office API, guidelines on consuming Business Logic Components and Visual Components, and details on those API elements that are used/consumed by multiple Expert Back Office applications. You will want to use this Reference whether you will be working with just one or all six of the application APIs.
- The six Browser applications API references which provide API detail specific to the Expert Back Office Browser applications to assist you in customizing those applications.

The Browser Inquiries API provides details about a large number of Inquiries visual components to jump-start Expert Back Office Inquiries development. Each visual component has a defined entry point – a URL – and can contain one or more web pages.

Objectives of This Guide

The Browser Inquiries Application Programming Interface (API) Reference is intended to supply building blocks that, along with the specific CMS.Net application API references, allow client developers to create custom Expert Back Office applications, automate processes, and vary deployment models.

Scope and Limitations of This Reference

This Reference will provide information and instruction on various elements of the Browser API. While this document provides some information relating to the APIs of specific Expert Back Office Browser applications and their functions, it is not intended as a guide to those APIs. See the appropriate Expert Back Office Browser application API for details on that application.

Intended Audience

The Browser API Reference serves the needs of client developers wishing to extend, customize or modify Expert Back Office functionality and its deployment. Developers working with this API must be familiar with the Expert Back Office Powered by CMS.Net CS (client/server) database.

Disclaimer

The code samples and other examples provided in this ADERANT document are provided "as is" without warranty of any kind. ADERANT cautions RECIPIENT to determine for self the suitability of the use of the code samples and other data provided as examples of functionality in this document for any purpose. To the extent permitted by law or statute, ADERANT disclaims all warranties, either expressed or implied, including the warranties of merchantability and fitness for a particular purpose. To the extent permitted by law or statute in no event shall ADERANT or its suppliers be liable for any damages whatsoever including direct, indirect, incidental, consequential, loss of business profits or special damages, even if ADERANT or its suppliers have been advised of the possibility of such damages.

Inquiry Groupings

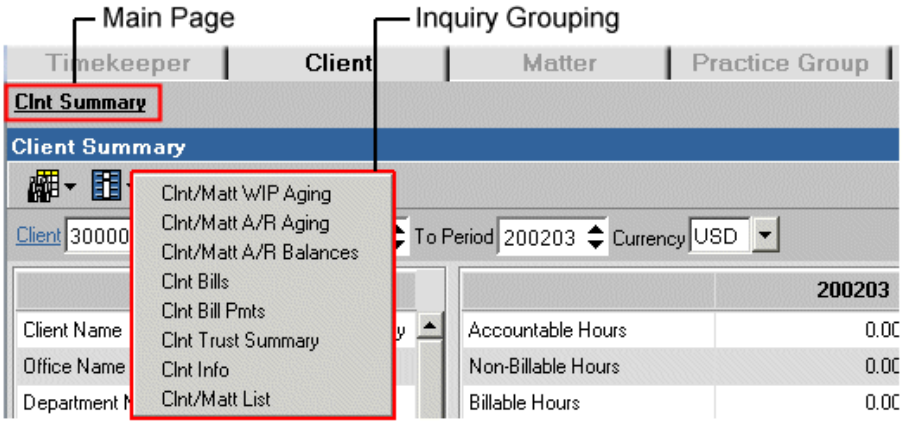
At the most granular level, developers can select from one of many Expert Back Office Inquiries visual components, which are grouped by inquiry. Several inquiry groupings support back office analysis activities:

- WIP Analysis
- A/R Analysis (includes Credit Information)
- Bills
- Trust
- Client Information
- Matter Information
- Timekeeper
- Practice Groups

Each inquiry type is accessible from one of four main pages:

- Client Summary (ClientSummary)
- Matter Summary (MatterSummary)
- Timekeeper (TimekeeperSummary)
- Practice Groups (PGSummary)

This illustration shows how end-users can access several inquiry groupings from IQClientSummary.aspx:

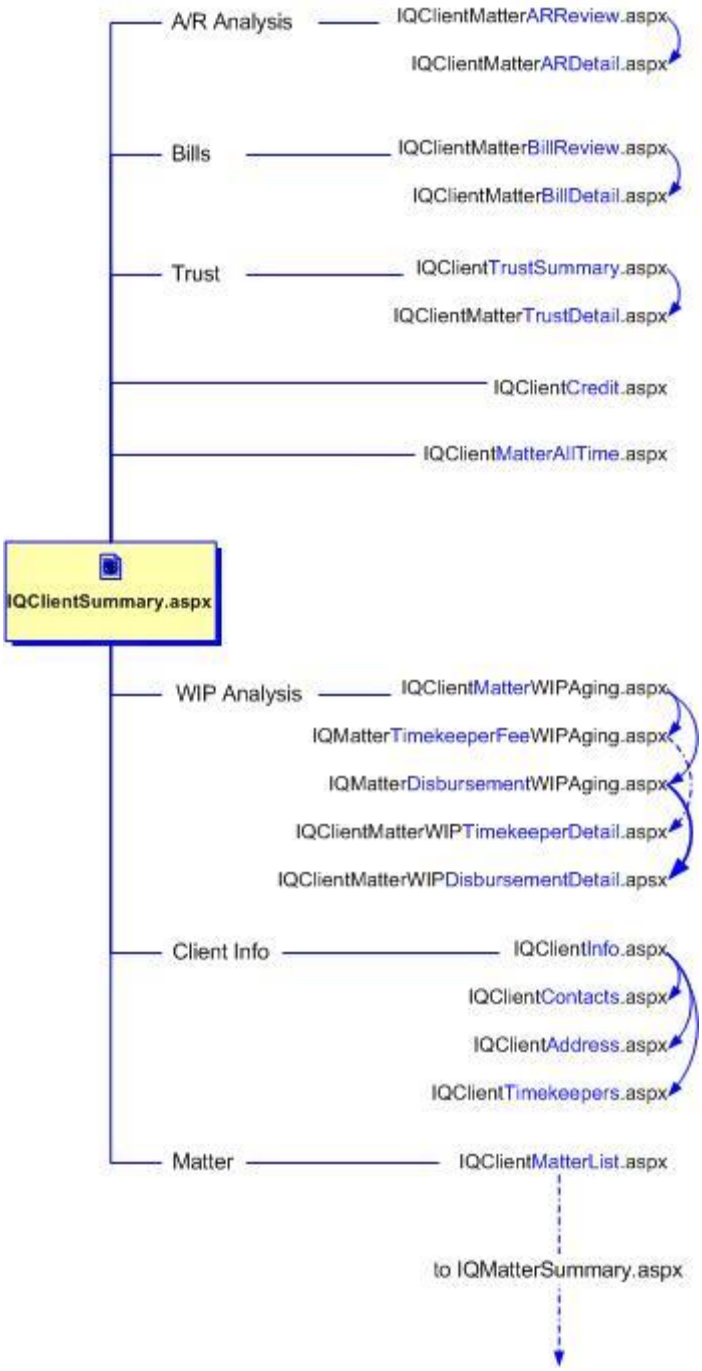


Inquiries Accessible from IQClientSummary

ClientSummary

The **ClientSummary** visual component provides the main page from which end-users can point-and-click to reach six different client inquiries.

This illustration shows which aspx files are accessible via **ClientSummary** and how the aspx files relate to one another.

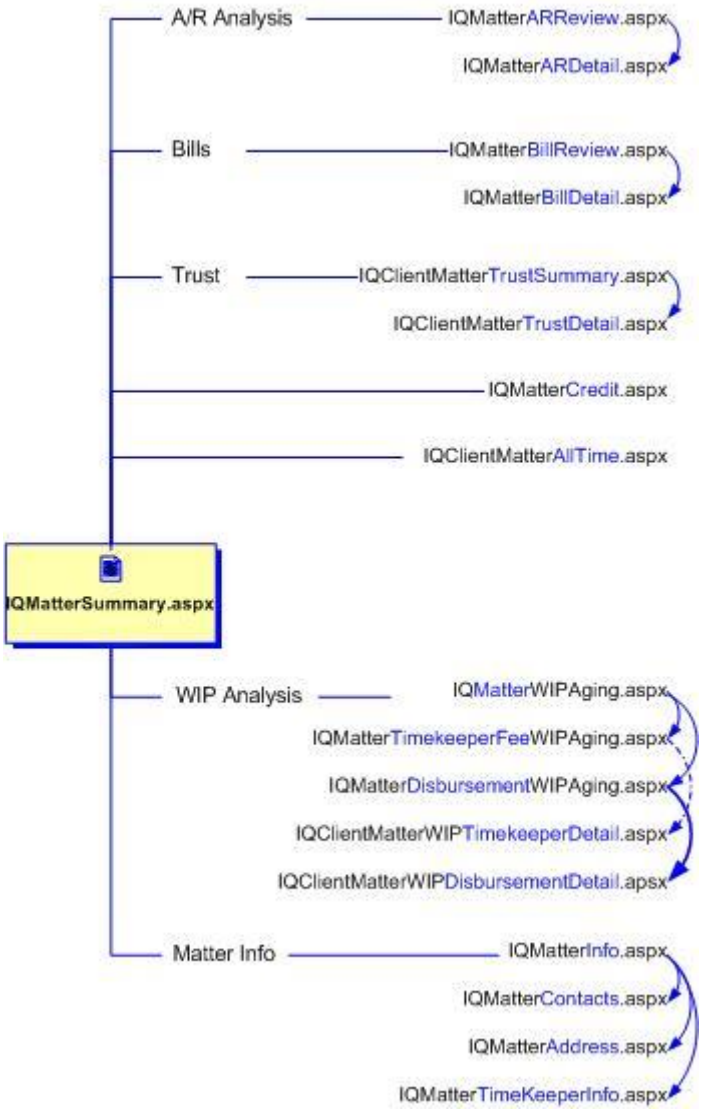


Client Summary Visual Components

MatterSummary

The **MatterSummary** visual component provides a main page from which end-users can point-and-click to reach five different matter inquiries.

The user accesses **MatterSummary** by clicking the “Matters” link on the **ClientMatterList** page.



Matter Summary Visual Components

PGSummary

The **PGSummary** visual component provides a main page from which end-users can point-and-click to reach seven different practice group inquiries.

TimekeeperSummary

The **TimekeeperSummary** visual component provides a main page from which end-users can point-and-click to reach seven different timekeeper inquiries.

Role-Based Security

For Expert Back Office Inquiries, the data displayed by visual components often depends upon the user's timekeeper role or membership in an entity. For each client or matter, there are four timekeeper roles that the Site Administrator can designate:

- Billing Timekeeper
- Responsible Timekeeper
- Assigned Timekeeper
- Working Timekeeper

Certain visual components will use the end-user's timekeeper role for the entity to determine which controls and data to display. Visual components may also use the user's membership in an entity to filter available data, i.e., to display appropriate matter or client data for this user. Data entities include:

- Clients
- Matters

All entities are stored in the Expert Back Office for Client/Server database.

Visual Components (VCs)

Visual Component Groupings

The VCs for Expert Back Office Inquiries are sorted by their grouping with a corresponding module path number. The groupings are as follows:

- Expert Back Office Client Level Inquiries – 50020
- Expert Back Office Client/Matter Timekeeper inquiries – 50090
- Expert Back Office Matter Level Inquiries – 50055
- Expert Back Office Practice Group Inquiries – 50110
- Expert Back Office Timekeeper Group Inquiries – 50150

Common Parameters

These parameters are common to all visual components. The following are common parameters that appear in Expert Back Office Inquiries:

Parameter Name	Options	Type	Req'd	Notes
$titleBar				A value of hide will hide the title bar; defaults to show.
$toolBar				A value of hide will hide the tool bar; defaults to show.
$inlineFilter				A value of hide will hide the inline filter region. A value of disable will disable the inline Filter region. Defaults to show and enabled.
$hl_url				A value of disable will disable all hyper links for the display component; defaults to enabled if hyper links are available.
$hl_<location>				A value of disable will disable only the hyperlinks associated with the provided location if hyperlinks are available.
$advancedFilter				A value of disable will disable the advanced filter button; defaults to enabled if advanced filters are available.
$quickLinks				A value of disable will disable the quicklinks dropdown; defaults to enabled if quicklinks are available.
$f_<filter name>				A value of hide for a given inline filter <filter name> will hide the inline filter control; defaults to show.

CMS.Net Client Level Inquiries – 50020

Bill Display - BillDisplay

Access BillDisplay via one of two inquiries:

- Matter Bills By Date
- Client Bills

A copy of the prepared bill, if available, appears in the Word Viewer. If one is not available, the message "*The document you requested does not exist*" displays.

Functional Security

Note functional security will be enforced for the following visual component (either Client or Matter):

Module	Rights Name
CMS.Net Inquiries Application\CMS.Net Inquiries Visual Components\Client Level Inquiries\ Bill Display 1,50000,50002,50019,50020,50069	Execute
CMS.Net Inquiries Application\CMS.Net Inquiries Visual Components\Matter Level Inquiries\ Bill Display 1,50000,50002,50019,50055,50069	Execute

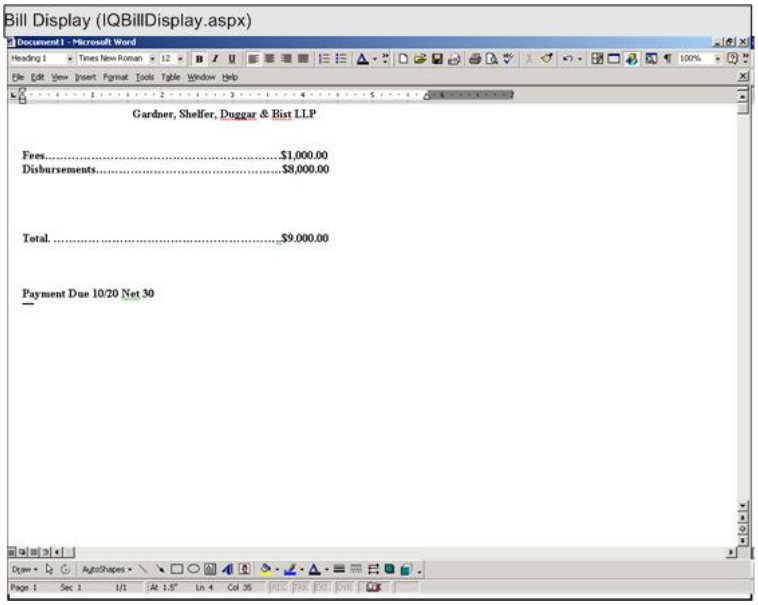
http://<servername>/CMSNet/Inquiries/ClientVC/BillDisplay.aspx

- or -

http://<servername>/CMSNet/Inquiries/MatterVC/BillDisplay.aspx



Bill Display – BillDisplay

Client A/R List - ClientARList

As the name suggests, the Client A/R List Inquiry provides a listing of accounts receivable at the Client level. Information provided includes Client code and name, and a summary of that client's outstanding accounts receivable aged as current, 30, 60, 90, or 120 days, and total A/R. Filters in the inquiry header allow substantial control over what information is displayed.

Parameters

The following parameters may be specified on the URL:

Parameter Name	Region	Type	Req'd	Notes
currencyCode	inline	string	true	
clientCode	advanced	string	false	
ARType	advanced	string	true	
officeCode	advanced	string	false	
departmentCode	advanced	string	false

Client A/R List – ClientARList

Client Summary - ClientSummary

Client Summary displays current financial standing for a selected client. Fields are logically grouped based on:

- Hours
- Billed Amounts
- Amounts Written Up/Down
- Amounts Written Off
- Credit Balances
- WIP Balances
- Accounts Receivable
- Columns displaying period based information are located on the right side of the page

Parameters

The following parameters may be specified on the URL:

Parameter Name	Options	Type	Req'd	Notes
clientCode	inline	string	true	Code of the client to display
fromPeriod	inline	integer	true	Starting period on which to filter results; defaults to TBM_PARMS.current_period
toPeriod	inline	integer	true	Ending period on which to filter results; defaults to current year.
currencyCode	inline	string	true	Currency format in which to display currency data; defaults to user currency preference HBM_PERSNL.currency_code if not specified.

Client Timekeepers –ClientTimekeeper

Client Trust Summary - ClientTrustSummary

Client Trust Summary provides a listing of all trust associated with a client irrespective of the attached matter. A hyperlink is provided to Client/Matter Trust Details - ClientMatterTrustDetail on each individual trust. Fields include:

- Trust Number
- Trust Name
- Associated Matter Code and Name
- Trust Type
- Bank Code
- Held
- Available
- Available to Invest
- Invested amounts with corresponding total balance for each trust listed as well as the total amounts summed across trusts for the chosen client are also included

Parameters

The following parameters may be specified on the URL:

Client Bill List – ClientBillList

Client Bills - ClientBillReview

Provides a choice of displaying a listing of client bills. Displays a client code, currency, and period filter as well as the ability to filter based on bill status such as:

- All
- Outstanding
- Settled
- Written Off
- Canceled

Parameters

The following parameters may be specified on the URL:

Parameter Name	Region	Type	Req'd	Notes
clientCode	inline	string	true	Code of the client to display.
billStatus	inline	string	true	Specifies what bill status to include in report.
currencyCode	inline	string	true	Currency format in which to display currency data; defaults to user currency preference if not specified.
fromPeriod	inline	integer	true	Specifies what beginning period is for search.
toPeriod	inline	integer	true	Specifies what ending period is for search.

Client Contacts –ClientContacts

Client Credit - ClientCredit

Client Credit is accessed from its parent, Client Summary - ClientSummary within the CMS.Net Inquiry suite. Client Summary hyperlinks exist on:

- Retainer
- Unapplied Cash On Account Fees
- On Account Disbursement
- Total numerical fields

Based on the hyperlink chosen, the proper filter (All, Retainer, Unapplied Cash On Account Fees, On Account Disb) is applied to the component on execution. The filter option allows the user to filter on the credit type from within the component.

Parameters

The following parameters may be specified on the URL:

Parameter Name	Region	Type	Req'd	Notes
clientCode	inline	string	true	Code of the client to display.
creditType	inline	string	true	Credit type on which to filter.
currencyCode	inline	string	true	Currency format in which to display currency data; defaults to user currency preference if not specified.

Client Credits –ClientCredit

Client Information - ClientInfo

Client Information is the central navigation point when launched from within the inquiry visual component container. Hyperlinks exist to client addresses, client contacts, and client timekeeper components. Client Information provides static hub data relating to the client such as:

- Client Name
- Code
- Office
- Department and Profit Center
- Primary Associated Timekeepers
- Client Classifications
- Time

- Disbursement and Billing Parameter Information

Parameters

The following parameters may be specified on the URL:

Client Matter List –ClientMatterList

Client/Matter All Time - ClientMatterAllTime

Client / Matter All Time provides a detailed listing of worked time for a client or client matter combination. Time entries can be filtered by time status including:

- WIP
- Billed
- Prebill
- Not Posted Status across period ranges
- Time entry fields provided include:
- Time ID
- Date
- Period
- Timekeeper

- Phase Task
- Action Code Information
- All valid hour and financial amounts associated with a time entry

Parameters

The following parameters may be specified on the URL:

Parameter Name	Region	Type	Req'd	Notes
clientCode	inline	string	true	Code of the client to display.
matterCode	inline	string	false	Code of the client to display.

Client/Matter Trust Details - ClientMatterTrustDetail

Client / Matter Trust Details provide transactional details associated with a chosen trust. This component can be accessed from both Client Trust Summary - ClientTrustSummaryand Client/Matter Trust Summary - ClientMatterTrustSummary. As trust must be associated with a matter, the inquiry serves a dual purpose at both the client and matter inquiry level. Fields include static detail information about the trust consisting of:

- Trust Currency
- Bank
- Trust Type
- Open and Close Date
- Balance
- Held Amount
- Available Amount
- Funds available to invest.
- Transactional information includes:
- Transaction Date
- Period
- Description of the transaction with narrative
- Resulting increase or decrease to the trust balance

Parameters

The following parameters may be specified on the URL:

Parameter Name	Options	Type	Req'd	Notes
clientCode	inline	string	true	Code of the client to display
matterCode	inline	string	true	Code of the client to display
trustNumber	inline	integer	true	uno of the trust to display

Matter Bills by Date – MatterBillsByDate

Matter Contacts - MatterContact

MatterContact provides a list of associated contacts for a chosen matter. Fields include:

- Contact Name
- Title
- Contact Type
- Contact Rank
- Phone Number and Extension
- Beginning and Ending Contact Dates
- Potential Conflicts noted

Parameters

The following parameters may be specified on the URL:

Parameter Name	Region	Type	Req'd	Notes
clientCode	inline	string	true	Code of the client to display.
matterCode	inline	string	true	Code of the matter to display.

Matter Contacts –MatterContacts

Matter Credits - MatterCredit

Matter Credits is accessed from its parent, Matter Summary - MatterSummary within the CMS.Net Inquiry suite. Matter Summary hyperlinks exist on the Retainer, Unapplied Cash ON Account Fees and On Account Disb and Total numerical fields in MatterSummary.aspx. Based on hyperlink chosen, the proper filter (All, Retainer, Unapplied Cash On Account Fees, On Account Disb) is applied to the visual component on execution. The filter option allows the user to filter on the credit type from within the component.

Parameters

The following parameters may be specified on the URL:

Parameter Name	Region	Type	Req'd	Notes
clientCode	inline	string	true	Code of the client to display.
matterCode	inline	string	true	Code of the matter to display.
creditType	inline	string	true	Credit type on which to filter.
currencyCode	inline	string	true	Currency format in which to display currency data; defaults to user currency preference if not specified.

Matter Disbursement WIP Aging - MatterDisbursementWIPAging

Matter Disbursement WIP Aging provides an aged view at current, 30, 60, 90, and 120-day-old Hard Disbursement WIP at the matter level. Each Hard Disbursement amount is further broken down and aged across current to 120-day-old by individual cost code. A hyperlink is available to disbursement details when accessing the matter code (ClientMatterDisbursementDetail.aspx)

Parameters

The following parameters may be specified on the URL:

Parameter Name	Options	Type	Req'd	Notes
clientCode	inline	string	true	Code of client to be displayed
matterCode	inline	string	true	Code of matter to be displayed
currencyCode	inline	string	true	Currency format in which to display currency data; defaults to user currency preference if not specified.

Matter Information - MatterInfo

Matter Information Inquiry is the central navigation point when launched from within the inquiry visual component container for static matter data. Hyperlinks exist to matter addresses, matter contacts, and matter timekeeper visual components. The matter information visual component provides the user with static hub data relating to the matter. This information includes:

- Matter Name
- Code
- Office
- Department
- Profit Center
- Primary Associated Timekeepers
- Matter Classifications
- Time
- Disbursement
- Billing Parameter

Parameters

The following parameters may be specified on the URL:

Parameter Name	Options	Type	Req'd	Notes
clientCode	inline	string	true	Code of the client to display.
matterCode	inline	string	true	Code of the matter to display.

Matter Information Inquiry – MatterInfo

Matter Summary - MatterSummary

Matter Summary displays current financial standing for a selected client/matter. Fields are logically grouped based on:

- Hours
- Billed Amounts
- Amounts Written Up/Down
- Amounts Written Off
- Credit Balances
- WIP Balances
- Accounts Receivable
- Columns displaying period based information are located on the right side of the page

Parameters

The following parameters may be specified on the URL:

Parameter Name	Options	Type	Req'd	Notes
clientCode	inline	string	true	Code of the client to display.
matterCode	inline	string	true	Code of the matter to display.
fromPeriod	inline	integer	true	Starting period on which to filter results; defaults to the current period.

My Clients –TimekeeperClientOrigination

Timekeeper Client Origination List - TimekeeperClientOriginationList

Displays a list of clients originated by the user-specified timekeeper. Data displayed includes Client Code, Client Name, WIP Balance, A/R Balance, Last Payment Date, Last Payment Amount, Billing Realization, and Fee Cash Realization.

Drill down capabilities on all columns except the Realization columns, give you access to additional details.

Parameters

The following parameters may be specified on the URL:

Parameter Name	Options	Type	Req'd	Notes
timekeeperCode			true	Code of the timekeeper to display
timekeeperType	inline	string	true	
fromPeriod	inline	integer	true	
toPeriod	inline	integer	true	
currencyCode			true	Currency format in which to display currency data; defaults to user currency preference if not specified.

Timekeeper Information –TimekeeperInformation

Timekeeper Matter Fee A/R Aging - TimekeeperMatterFeeARAging

The Timekeeper Matter Fee A/R Aging inquiry displays an aged analysis of accounts receivable, summarized by Matter, for a user-specified timekeeper. You may further filter the information displayed by selecting a client and matter. Data provided includes matter code and name, client code and name, and a breakdown of the timekeeper's A/R into Current, 30 day, 60 day, 90 day, and 120 day buckets.

Parameters

The following parameters may be specified on the URL:

Parameter Name	Region	Type	Req'd	Notes
timekeeperCode	inline	string	true	Code of the timekeeper to display
currencyCode	inline	string	true	Currency format in which to display currency data; defaults to user currency preference if not specified.
clientCode	advanced	string	false	Code of the client to display
matterCode	advanced	string	false	Code of the matter to display

Getting Support

If you have any difficulty, we recommend that you obtain assistance from the following sources.

Support Portal

The Content tab of the Support Portal contains the following information:

- Release documents (Release Notes and Installation Guides).
- Product documentation (User, Administration, Customization, and Application Setup Guides).
- Knowledge Base articles relating to the installation, customization and use of the product.

To access these documents:

1. Access the Support Portal at *www.myaderant.com*

   Note: If you do not have login details for the Support Portal, please contact Aderant Support.

2. Click the **Content** tab.

   Tip: If the Content tab is not visible, click the unlabeled tab on the far right (only has a +), then click Content in the All Tabs list.

3. In the **Search in** field select **All Libraries** and enter words that may be in the title of the document.
4. Click **Go!**
5. Use the left pane to filter your results further. For example, you can filter by Installation Guide in the Content Type filter, or AE 8.1 in the Version filter.

User Help in Aderant Applications

Press *F1* in any application to launch the user help for the application.

Aderant Technical Help in Visual Studio

Administration and Customization help is available by clicking on the Aderant toolbar in Visual Studio.

Telephone Support

If the online help or our Support Portal do not answer your questions, Aderant Support representatives are available by phone.
